

lemony.ai

It is AI in a Box — a compact, on-premise generative AI solution that makes enterprise-grade AI simple, secure, and affordable for businesses of all sizes. With zero data leaving your network, no cloud risks, and no surprise costs, Lemony lets teams plug in, upload their documents, and start using powerful AI tools instantly — no engineers required.

Privacy & Compliance in AI for Business Teams

All your AI needs in a box,
on-premise, fully private
and secure, no cloud
access required.

 JETBRAINS

Your Organization's Private Knowledge Base Powered by AI

Corporate teams generate and rely on vast amounts of information such as documents, decisions, and insights. Lemony transforms this collective knowledge into a searchable, intelligent knowledge base that's always at your fingertips.

Bring Everything Together

Make sure nothing gets lost by collecting all your team's documents, notes and emails in one place.

Preserve Critical Know-How

Save important know-how before someone leaves, retires, or disappears from a project.

Find Answers, Not Just Files

Powered by private AI, ask questions in plain language and get real answers.

Lemony Agentic Backoffice with zero setup included

Built for privacy-first teams, Lemony runs entirely on your infrastructure. No cloud, no leaks — just full control. With local Knowledge base, private Agents, structured data understanding, and seamless team collaboration, Lemony makes your knowledge instantly usable, discoverable, and secure.

Compliant AI Suite for Business Teams

The Lemony Application runs out of the box, no installation, no setup. Just power it on, connect to your network, and start working. It's fully self-contained and ready to go with built-in chat, document tools, and team access.

Generative Chat

Conversations that help you write, decide, or explore.

Chat with Documents

Ask questions, get answers directly from your files.

Data Extraction Tools

Pull key dates, terms, and facts from large documents in a minutes.

Deep Knowledge Search

Find data across emails, PDFs, and archives instantly.

Document Insights

Get summaries, red flags, and structure without opening the file.

Tribal Knowledge Activation

Turn buried files and inboxes into living, searchable insights.

Custom Assistants

Assistants that follow your rules and speak your company's language.

Switchable LLM Models

Choose the best model for each task: Granite, LLaMA and more.

Document Management API

Integrate with your systems for uploads, folders, and automation.

User & Team Management

Control access, roles, and activity across your organization.

The screenshot shows the Lemony AI application interface. At the top, there's a search bar with the text "Annual market research report". Below the search bar, there are tool buttons for "Knowledge", "Transparency", and "Tools". A sidebar on the left lists various documents under "Knowledge", all titled "Monthly semiconductor market report.pdf" and dated "Apr 18, 2021". On the right, there are two main sections: "Insights" and "Share". The "Insights" section displays three items: "Email template" (18 MB), "Blog article - Release notes" (18 MB), and "Communication tone" (18 MB). Below these insights, there's a comment from "Gena Kamotski" asking if the tone of the ad copy is consistent across platforms. Another comment from "Sascha Buehrle" suggests the email version feels more formal. The bottom right corner shows the Lemony logo.

Real Stories from Real Users

“Our document structure is complex — Lemony doesn’t mind.”

When we handle a legal case, Lemony instantly surfaces all related contracts, emails, and notes. Then we chat with them like we would with a colleague. It’s like having a paralegal who never forgets and is always ready.

“We had years of knowledge trapped in inboxes. Today, we just ask Lemony.”

No more chasing files. Lemony indexes mails, PDFs, and internal folders and gives us clear answers in seconds. No more tribal knowledge loss. Everything's searchable.

“We nearly gave up after seeing AI costs.”

Between cloud fees, infrastructure demands, and hiring AI engineers, building internal AI felt impossible. Then we found Lemony: no GPU, no team, no setup. Enterprise AI without the enterprise overhead.

Lemony Agentic Backoffice with zero setup included

“Our AI assistant knows our playbook and keeps itself up to date.”

We uploaded our processes, docs, and templates, then set up a smart assistant to answer staff questions instantly. Support, onboarding, and compliance handled in seconds. It just works.

“We run in a secure, air-gapped environment. Now our AI does too.”

Security is non-negotiable. Lemony runs entirely offline, deployed on-site within our existing infrastructure. No data leaks ever.

The image shows the leemony AI platform's user interface. On the left is a sidebar with various options: New Chat, Shared Documents (which is highlighted in yellow), Chats, Assistants, AI Models, My AI Tools, and Team. The main area is titled 'Shared Documents' and contains a search bar, filters for 'All types' and 'Modified', and buttons for 'Create Folder' and '+ New'. Below these are sections for 'Name' and 'Last Modified', listing categories like 'General', 'Clients', 'Contracts', 'Cases 2023', 'Cases 2024', 'Reports', and 'Inbox'. To the right of the interface is a physical computer tower. The tower is white with a yellow vertical panel on the side. It has a screen displaying the text 'leemony PROTOTYPE 011' and a small circular icon. There are also other icons on the tower, including a globe, a power button, and a circular arrow. The text 'INTERNET' is written vertically on the side of the tower.
